we work, live, play,  
and learn

## COURSE OVERVIEW

This Revit Architecture course is designed to provide students with a comprehensive understanding of Building Information Modeling (BIM) using Revit. Through 12 weeks of hands-on training, participants will learn how to create, modify, and manage architectural designs efficiently. The course focuses on both basic and advanced Revit tools, ensuring that students gain proficiency in creating floor plans, elevations, 3D views, structural elements, and detailed construction documentation.

## COURSE SCHEDULE

- 12 weeks
- 01-hour lecture
- 01-hour practice
